PROFILE

Artificial Intelligence Systems student with hands-on experience in building real-world AI-powered applications. Skilled in backend development, NLP, and data-driven solutions. Developed multiple deployed projects using Python, Streamlit, and transformer-based models. Currently participating in an Erasmus+ exchange semester in Austria, gaining international experience in applied AI systems and working in a project-based academic environment.

PROFESSIONAL EXPERIENCE

09/2024 – 05/2025
Vilnius, Lithuania

Customer Success Agent

CyberCare

Handled high-volume customer support via Zendesk through chat and email, resolving technical issues related to VPN and software usage. Assisted in onboarding new users and provided clear guidance on product usage. Supported junior agents and contributed to improving response efficiency and overall customer satisfaction.

EDUCATION

09/2023 – Present
Vilnius, Lithuania

Bachelors Degree

Vilnius Gediminas Technical University (VILNIUS TECH)

Specialty: Artificial intelligence systems

02/2026 – 06/2026
Austria

Erasmus+ Exchange Semester (IWV Program)

FH JOANNEUM University of Applied Sciences

Relevant coursework includes AI Applications & Automation, Machine Learning & AI for Security, Secure iOS Development, and ERP Information Management.

Conducted an Industrial Research Project and gained hands-on experience in applied AI and system development in an international, project-based environment.

SKILLS

Python

Data processing, automation scripts, backend development, NLP, semantic similarity, PDF parsing

Streamlit

Web apps, UI design, state management, deployment

Docker

Containerization, service orchestration

Customer Support & Communication

Professional email communication, live chat support, problem resolution, client onboarding

JavaScript

Interactive UI, DOM manipulation, responsive design

Machine Learning & NLP

Sentence Transformers, scikit-learn, cosine similarity, intent recognition
Skill Level: Intermediate

REST API Design

CRUD operations, role-based authentication, JSON data exchange

Zendesk

Ticket management, automation macros, customer query tracking, reporting

HTML & CSS

Responsive design, Bootstrap, UI/UX layout, theming

Git & GitHub

Version control, branching, collaborative workflows

Multilingual Development

Google Translate API, multilingual chatbot, localization

LANGUAGES

English

PROJECTS

08/2025 – 08/2025

AI Support Chatbot

Self-Initiated Project

AI Support Bot Multilingual chatbot with intent recognition and translation support. Features an interactive UI and real-time conversation handling.

Tech: Python, Streamlit, Sentence Transformers, Google Translate API

06/2025 – 06/2025

AI Resume Matcher

Self-Initiated Project

Built an AI-powered web application that matches resumes with job postings using semantic similarity. Integrated real-time job data from external APIs and implemented resume parsing and skill extraction. Designed a clean and interactive interface with filtering and search functionality.
